

Scene Preservation

320.1 PURPOSE AND SCOPE

The purpose of this policy is to provide Sanibel Fire and Rescue District members with guidance on performing emergency mitigation tasks when working in and around scenes where evidence may be present. Members of the District are often confronted with opposing priorities when performing duties at scenes containing potential evidence. They must balance the need to provide timely and effective life-saving and property-preserving services while minimizing the disturbance of any items of evidentiary value. In some instances, district members must evaluate whether to enter a scene or to initiate mitigation activities.

320.1.1 DEFINITIONS

Definitions related to this policy include:

Evidence - Any item or arrangement of items that may provide relevant information to an investigation.

Scene - Any location where items of evidentiary value may be found. A scene need not be the location where a criminal act occurred; it need only be a location where items of evidentiary value are available for collection or documentation.

320.2 POLICY

It is the policy of the Sanibel Fire and Rescue District to minimize the disturbance of conditions and evidentiary items when providing emergency mitigation services in and around scenes.

320.3 SCENE IDENTIFICATION

Sanibel Fire and Rescue District members must be mindful of encountering potential evidence at a scene whenever they respond to calls for service. The potential for evidence at a scene may be identified in a number of ways, including, but not limited to:

- (a) The location of any incident that involves a physical assault or results from an act of violence. Such a location should be assumed to be a crime scene. Examples include shooting incidents, stabbing incidents, any incident involving a medical patient injured by the act of another person, suicides, bomb incidents or any act of terrorism.
- (b) Any incident that law enforcement personnel have identified as a crime scene and have notified district members of that determination.
- (c) Any unattended death scene.
- (d) All fire incidents.
- (e) Any incident where district members believe or have a reasonable suspicion that a crime has taken place. The type of suspected criminal activity may be severe, as in the case of a robbery or burglary, or less severe, as in the case of vandalism.
- (f) Transportation incidents, including traffic accidents and rail, aircraft, shipping and boating incidents.

Scene Preservation

- (g) Industrial accidents.

320.4 ENTERING SCENES

When district members determine that a scene containing potential evidence is involved, they should promptly evaluate the need to enter the scene prior to approval of investigators. For the purposes of district members, scenes may be categorized into two distinct types: stable or unstable.

320.4.1 STABLE SCENE

A stable scene exists when there is no apparent immediate or ongoing threat to the safety, health or well-being of district members, the public or property. Examples of stable scenes include incidents where the victim or victims are obviously deceased, incidents involving obviously failed incendiary devices and fire incidents where the fire is clearly extinguished prior to the arrival of district members.

When district members encounter a stable scene and it is apparent that no threat to safety or property exists, they should remain outside the scene until cleared to enter by the appropriate investigator or law enforcement personnel. If there is a confirmed or suspected threat to life or public safety, district members should take whatever actions reasonably appear necessary to stabilize the scene and then withdraw pending approval from investigators or law enforcement personnel to re-enter.

320.4.2 UNSTABLE SCENE

An unstable scene exists whenever there appears to be an ongoing or imminent threat to the health, safety or well-being of district members, the public or property that necessitates immediate mitigation. Examples of unstable scenes include incidents involving injured or entrapped persons, active fire or a threat of imminent fire, imminent structural collapse endangering lives, the release or imminent threat of the release of hazardous materials or any incident where immediate mitigation is required to preserve life.

When district members encounter an unstable scene they are authorized to take appropriate corrective action to mitigate the threat.

320.5 PRESERVATION OF EVIDENCE AT CRIME SCENES

Whenever practicable, district members should avoid touching, moving, manipulating or otherwise altering anything located at a scene where the potential for evidence exists. In some circumstances, the need to move items may be unavoidable. In those instances, district members should note what items were moved, who moved them and the location from which they were moved. Members should not attempt to move displaced items back to their original location; rather, the items should be left in the place to which they were moved. The appropriate investigator or law enforcement personnel should be informed of any items that were moved and the location where the items originally were found.

Sanibel Fire and Rescue District

Fire Policy Manual

Scene Preservation

In instances where an obvious item of evidence must be moved, an investigator or law enforcement representative should be consulted prior to moving the item, if practicable. For example, if a weapon is located beside or underneath a victim and an investigator is available, the investigator should be called to relocate the weapon. Life-preserving care should not be unreasonably delayed awaiting the arrival of an investigator or law enforcement personnel to move items of evidence. The Lee County Arson Task Force should be contacted as soon as possible.

320.6 MEDICAL SUPPLIES AND DEBRIS

When district members provide medical care in or around a scene where evidence may be located, any discarded medical material, wrapping material, used bandaging, containers or other debris should be left at the scene when the crews depart. Reusable tools, medical equipment and other durable supplies may be collected but care should be taken by district members to minimize any disturbance to other items or material at the scene. Hazardous items and other material, such as medical sharps, controlled substances or surplus medications, should be collected and handled appropriately. If investigators or law enforcement personnel direct that any hazardous materials be left in place, district members should clearly identify all such materials to the controlling authority at the scene.
